Profile: WEB DEVELOPER.

I am a passionate web developer and 9th semester Computer Engineering student with strong academic support and practical experience. I have a diploma in Data Analytics in Business Management, which has provided me with a comprehensive vision of how to use information to make strategic decisions.

My primary focus is on web development, where I have demonstrated outstanding skills. Additionally, I am versed in various technologies such as object-oriented systems in Java Desktop, JavaScript, PHP, Laravel, HTML, CSS, Tailwind CSS, Css/SASS, Ajax and Git, allowing me to create attractive and functional web solutions.

My database management competency includes SQL Server and MySQL, which supports the robustness and efficiency of the applications I develop. In addition, I have solid knowledge of the Linux operating system and experience in the technical support area.

Actively seeking my first job opportunity as a software developer, I am eager to apply my skills and knowledge in a professional environment. My solid academic training combined with my practical experience positions me as a candidate capable of providing innovative and quality solutions to any team. I am excited by the possibility of contributing to the success of a project and continuing to learn and grow in the field of software development.

Studies carried out and ongoing:

- Currently Student of Computer Engineering in the 9th semester at the (International University Foundation of La Rioja).
- Diploma in Data Analytics in Business Management - (International University Foundation of La Rioja).
- Technologist in Analysis and Development of Information Systems (Cenigraf-Sena).
- Course and Certification in introduction to object-oriented programming in java (Udemy).
- Course and Certification of English Dot Works (Sena).
- Cybersecurity Course and Certification: Ethical Hacking and Penetration Test (Udemy).
- Java Course: Java Professional Course and Certification – From Zero to Master (Udemy).
- Course and Certification in Web Development - FrontEnd Web Developer (Udemy).
- Complete Web Development Course with HTML5, CSS3, JS AJAX PHP and MySQL (Udemy).
- Laravel 9 course, Development of websites with php 8 and MVC and tailwind CSS (Udemy).
- Git course for developers.

Position: intern at Corporación Surcos.

Company name: Corporación de Desarrollo Social Surcos.

Functions and achievements of the position:

- Design, development and implementation of the Surcos Corporation website.
- Redefinition and maintenance of Digital marketing of the Surcos Corporation.
- Creation of a procedure manual for digital publication processes of the Surcos corporation.
- Maintenance of social networks.
- Advice on maintenance of the Corporation's information systems.
- Computer consulting.

Throughout my stay at the Internship Center of the Surcos Social Development Corporation located in Ibagué, Tolima, I directed my efforts towards strengthening its online presence and expanding its reach through various initiatives. One of my fundamental tasks was to design and create a complete website that effectively communicated the activities and purpose of the corporation. The main purpose of this website was to attract a broader audience interested in supporting and benefiting from the programs and services offered by the entity, aimed at improving the quality of life of families and communities, covering areas such as health, education, housing, decent work, justice and peace.

In addition to creating the website, I focused on reformulating and maintaining the digital marketing strategy of all the social networks of the Surcos corporation. This involved the development of a detailed manual that outlined the procedures for both the digital marketing of all social networks and for the operation of the website mentioned above. Throughout this entire process, I provided advice on different technologies to ensure a comprehensive and effective implementation of these initiatives.

Within the initial contextual framework, I was tasked with carrying out a series of tasks that encompass the development and design of a website. In this project, I made use of various technologies, among which MySQL databases, languages such as PHP, HTML, JAVASCRIPT, CSS, BOOTSTRAP, MVC, OOP and the use of some APIs stand out. In addition, I was assigned the task of reformulating and maintaining the digital marketing strategy of all the networks of the Surcos corporation, as well as the preparation of a detailed manual that details the optimal procedures for the proper use of both the website and the strategies. digital marketing.
